Ctrltech[®]
Power, Cooling & Monitoring

About Us

Control Technologies FZE (Ctrltech) is known for Power, Cooling & Monitoring solutions for Datacenter and Server Rooms. We design, supply and install Power, cooling and monitoring equipment which includes UPS, Computer Room Air Conditioner (CRAC) or Close Control Unit (CCU), Dehumidifier, Humidifier, water leakage detection system, TVSS, ATS, PDUs, Isolation Transformer, raised flooring, Access control, Fire suppression etc. We supply best brands of product available in market to achieve efficient solution.

We promise our customers with the highest quality of services possible. Ctrltech is dedicated to deliver world-class infrastructure services, effective solutions, competitive pricing and most importantly, excellent customer services that listen to the customers. We not only design basic layout of datacenter & small server room but also help you to freeze specifications & selection of brands for various equipment (as per TIA 942 Standards) like UPS, Batteries, distribution Panel, Automatic Transfer Switch, CCU (Air Conditioning), raised flooring, security equipment etc.

Vision Statement

Ctrltech want to be global total Solution & service provider for:

- 1) Power Supply, Distribution, Protection & Conditioning equipments required between power grid and computer chip.**
- 2) Designing of Data center.**
- 3) Leading Green Dehumidification Solution Provider.**
- 3) Infrastructure building for Tier 4 Data Center which includes Power, cooling & monitoring.**

Mission Statement

To provide one-stop green Solution & Services of Power, Cooling, Monitoring & Dehumidification for critical application with quality & reliability to achieve high uptime through satisfied, trained work force.

Ctrltech[®]
Power, Cooling & Monitoring

Products

Ctrltech offers following products:

Uninterruptible Power Supply

Closed Control Unit

Portable Dehumidifier

Voltage Stabilizer.

Clean Fire Suppression

Raised Flooring

Water Leak Detection

Power Distribution Unit (PDU)

Ctrltech[®]
Power, Cooling & Monitoring

Products

Ctrltech offers following products:

Static Transfer Switch (STS)

Environmental Monitoring

Automatic Transfer Switch

Swimming Pool Dehumidifier

Industrial Humidifier.

Ceiling Mount Dehumidifier

DC/AC Power Supplies.

Frequency Converter

Ctrltech[®]
Power, Cooling & Monitoring

Services

Ctrltech offers following Services:

1. Design & Build Data Center & Server Room:

Ctrltech design & build Data centers and Server Room based on industry standards. We can help you change an empty room or existing computer room into a 21st century data center design. Designing includes:

- ⇒ Documentation & Budgeting.
- ⇒ Site and environmental survey to select Data center Site.
- ⇒ Selection, Supply & Integration of various Data Center equipments like CRAC, UPS, Raised Flooring, Generator, ATS, fire detection/suppression, water detection, access control, security/CCTV, monitoring, soundproofing and more.

2. Support & Maintenance:

Data Center infrastructure includes various equipments. Regular maintenance of these equipments becomes necessity to keep high uptime. Ctrl Technologies provides:

- ⇒ Annual Maintenance contract for Power, Cooling, Security & Monitoring equipments like UPS, Generator, CRAC, Access control, fire suppression etc.
- ⇒ Quarterly Preventive maintenance.
- ⇒ Suggestions regarding security & Monitoring of Data center.

3. Audit of Existing Data Center:

Due to continuous changing technologies, one needs to keep updated infrastructure of Data Center for highest efficiency and Uptime. Ctrl Technologies Systems provide audit for:

- ⇒ We check issues regarding Power, cooling efficiency and provide solution.
- ⇒ We assess security and protection standard of Data Center.
